

COVID -19 Testing Policy

Due to high demand for Covid testing, we will ask the patients scheduled for surgery at Lighthouse to be tested three days before their procedures. This aligns with the St. Francis Hospital policy for their procedures. After the patient's test, they will be required to quarantine until the day of surgery.

Quarantine means that the patient will stay at home until the day of surgery. They may only leave for important scheduled doctors' appointment or Pre-Op Labs.

Although we prefer the patients to stay at home, if they need to go to work, the workplace must provide an environment that is safe for the prospective patients which includes:

- Mask requirements
- Proper Social distancing
- Frequent hand washing policy

On the day of surgery, the patient will be asked about their quarantine status. If we discover a substantial breach of the protocols they will be canceled.

Our Pre-Op screening calls will emphasize our Covid testing policy, but it is the expectation that the surgeon's offices will reinforce the requirement to quarantine at home and to obtain the Covid test two days before surgery.

We have created a self-isolation instruction sheet that can be handed out to the patients.
